GLOBAL CROSSING READY-ACCESS® AND EMEETING

Chairperson Guide

SETTING UP A CONFERENCE CALL
When you are ready for a conference follow these simple steps:

1. Inform all participants of the date and time of the conference.
2. Give all participants your Ready-Access phone number and 7-digit access code.
3. When it is time for your conference, dial in on the Ready-Access phone number, enter your 7-digit access code, then listen to the prompts to enter your Chairperson passcode to begin the conference.
4. Conference participants dial the Ready-Access number at the designated time, enter the 7-digit access code, and the conference is underway.

READY-ACCESS ACCOUNT OPTIONS

➔ Change Chairperson passcode – change this periodically to ensure security
➔ Record participant name (on/off) – when set to “on” this allows you to use the Roll Call feature during a meeting and to use the Name Announce option (see below)
➔ Set conference entry/exit announcement (choose one): Tones, Silence, Name Announce

To change these settings dial in to Ready-Access; enter your 7-digit access code followed by your Chairperson passcode; press 2 to change account options and then just follow the voice prompts. These options can be changed as often as you like.

READY-ACCESS CONTROLS AND COMMANDS

As the conference Chairperson, you can control the access to your conference, as well as who can speak or just listen. To keep your conference well organized the following commands are available to you at any time during the conference. They can be activated through the touch-tone phone that you used to initiate the conference through your computer.

**CHAIRPERSON COMMANDS AND FEATURES**

HELPFUL HINTS FOR USING READY-ACCESS

→ The maximum number of participants that can join the conference (including the Chairperson) is based on your individual subscription. Anyone trying to join the conference once the maximum number of participants has been reached will not be able to join.

→ Learn to use Ready-Access quickly and easily with our tutorial, found at www.globalcrossing.com/conferencing, under “Audio Conferencing.” You can also find product feature updates and other news.

→ If participants dial in before the Chairperson, they will be placed on music hold until the Chairperson joins the conference.
   • The Quick Start feature allows conferencing to begin without requiring the Chairperson to start the meeting. This feature does override the security requirement of Chairperson Passcode entry to start the conference.*

→ When the Chairperson hangs up, the conference call will end. To allow the conference to continue after the Chairperson leaves, he or she should press # early in the conference in case of an inadvertent disconnection.
   • The Auto Continuation feature allows all conferences to continue after the Chairperson disconnects without any additional touch-tone commands.*

→ When a participant joins or leaves the conference a tone is normally heard. Some Ready-Access subscriptions are configured to record and announce the names of participants as they enter or leave the conference. When this feature is enabled, a Chairperson or participant can press # to receive a roll call of everyone on the conference.

→ To include participants, you can dial out to them after the conference has begun. Press # and follow the prompts. This is also an alternate method for connecting participants outside North America.

KEEPING YOUR CONFERENCE SECURE

Here are a few suggestions for maintaining the security of your conferences.

→ Change your Chairperson passcode number frequently. Follow these steps:
   1. Dial your Ready-Access phone number.
   2. Enter your 7-digit access code.
   3. Press the # key.
   4. Enter your current Chairperson passcode.
   5. Select Option 2.
   6. Follow the prompts to create a new Chairperson passcode (4-9 digits).

→ Assign an additional security passcode (4-9 digits) to sensitive conferences. Be sure to inform all participants of the security passcode before you begin the conference. After you have entered your 7-digit access code at the start of your conference, you will then be prompted to enter the security passcode for that conference. If you enter this passcode, everyone that dials into this conference must also enter the same passcode after entering the usual 7-digit access code.

→ To ensure maximum security use the lock conference feature; # to lock, # to unlock.

For questions about Ready-Access, please call 888.447.1119 in the U.S., 800.668.4703 in Canada or +1 303.389.4018 in all other countries at any time.

*Please check with your company’s conferencing administrator for availability of this feature.
EXPERIENCE THE POWER OF REAL-TIME COLLABORATION VIA THE INTERNET WITH EMEETING

Make your meetings more productive than ever with the powerful collaboration tool eMeeting. This Internet-based conferencing solution lets you dramatically improve the way you communicate by instantly sharing any document, presentation or application in real time.

CHAIRPERSON—HOW TO ACCESS EMEETING

To use eMeeting visit our Web site at www.globalcrossing.com/conferencing and click on “Web Conferencing.”

From here:
1. Click on the appropriate link to log into eMeeting.
2. Enter your Ready-Access phone number, 7-digit access code and Chairperson passcode (this is the same information you use to log into Ready-Access).
3. You are then directed to the “My Meetings” page within your meeting center.
4. From this point, you can schedule or start a meeting or utilize other options on the menu bar.
5. For assistance using eMeeting while on your Ready-Access call, dial 866.447.1119 on your phone handset. Contact Customer Support at 888.447.1119 in the U.S., 800.668.4703 in Canada or +1 303.389.4018 in all other countries for assistance at any time.

JOINING AN EMEETING — PARTICIPANTS

Participants may join an eMeeting by going to www.globalcrossing.com/conferencing and clicking on “Web Conferencing.” Then they can:
1. Click on the appropriate link to join and eMeeting as a participant. Participants may also join an eMeeting from a link on an e-mail invitation received from the Chairperson.
2. The participant is directed to the “Join Meeting” page within the meeting center.
3. The participant should then enter the meeting number in the appropriate field (the meeting number is provided by the Chairperson).
4. The participant should then enter his/her name (the e-mail address is optional) and password (if required).
5. The participant will be joined into the eMeeting.

EQUIPMENT/SOFTWARE NEEDS

Chairperson:

→ Ready-Access customers are automatically eMeeting enabled which allows them to host and create meetings. The Chairperson does not require any further equipment to use eMeeting other than a computer, high-speed Internet connection and browser. There is a browser plug-in required to use eMeeting which is downloaded automatically the first time a Chairperson starts/joins an eMeeting. There is no charge for the download.

Participants:

→ In order to participate in an eMeeting, the participant needs only a computer, high-speed Internet connection and browser. There is a browser plug-in required to use eMeeting which is downloaded automatically the first time a participant joins an eMeeting. There is no charge for the download.

A complete eMeeting host and presenter user guide, system requirements, product feature updates and other news can be found at www.globalcrossing.com/conferencing under “Web Conferencing.” For questions about eMeeting, call 888.447.1119 in the U.S., 800.668.4703 in Canada or +1 303.389.4018 in all other countries at any time.
READY-ACCESS WEB MEETING ALLOWS YOU TO:

→ Manage your Ready-Access meeting online using easy point and click conference commands
→ Show slide presentations and graphics to meeting participants
→ Record a conference (audio only or include synchronized slides)

SETTING UP A CONFERENCE CALL

1. If this is your first Ready-Access conference, familiarize yourself with the controls and capabilities of the standard Ready-Access conference commands.
2. Inform all participants of the date and time of the conference.
3. Give participants your Ready-Access phone number and 7-digit access code.
4. If you are using the Ready-Access Web Meeting slide presentation feature, provide participants with this URL to join the Web Conference: http://www.globalcrossing.com/conferencing
5. When it is time for your conference, dial in on the Ready-Access phone number, enter your 7-digit access code, then listen to the prompts to enter your Chairperson passcode to begin the conference.
6. Login to your Ready-Access Web Meeting (see below). If this is your first time using Web Meeting, allow extra time to download and install the Java plug-in.
7. Conference participants dial the Ready-Access number at the designated time, enter the 7-digit access code, and the conference is underway.
8. If a slide presentation is used, the participants can view slides using a standard web browser. (There are no plug-ins required for the participant).

LOGIN TO THE READY-ACCESS WEB MEETING

1. Using a Web browser, go to www.globalcrossing.com/conferencing and select “Start/Manage a Conference” from under “Ready-Access Web Meeting”.
   * If you have not previously installed Java 2 Runtime Environment 1.3 you will receive a message asking if you would like to begin installation of this plug-in. Click “OK” to start the installation.

2. A Java applet will launch the Ready-Access Web Meeting. You will be prompted with a security notice indicating that the application is verified to have come from Global Crossing Conferencing. Click “Start” to continue.
3. When the Chairperson Login screen is presented, enter your Ready-Access phone number, 7-digit access code and Chairperson passcode. Click “Login”. (Figure 1)

4. Participants who will be viewing a slide presentation will go to www.globalcrossing.com/conferencing, and select “Join a Conference” from under “Ready-Access Web Meeting.” The participant does not need to install anything to view the presentation. They will be prompted to enter your Ready-Access phone number and 7-digit access code.
   * After joining the slide presentation, the participant will be prompted to enter their name, email, phone and company. Only the name is required. Upon completion of the conference, the Chairperson will receive an email containing all of the participant registration information.
5. After you login you will be presented with the Ready-Access Web Meeting screens.

6. Participants who login will initially see the Ready-Access Participant Lobby screen if the Web Conference has not started. (Figure 2) If they login after the Web Conference has started, participants will see the slide that the Chairperson is showing to participants.

On the left side of the screen, the chairperson can view either the Web Controls or the Audio Controls. Web Controls allows the chairperson to start a Web Conference and enable Chat. When a Web Conference is enabled, a list of Web participants appears. Audio Controls allows the chairperson to see a list showing the number of lines in the audio conference as well as control the audio conference by using point and click commands.

The thumbnails on the bottom of the screen represent your current slide set. Those slides are immediately available for you to present to participants. The slide window on the right displays the current slide being shown to participants. There are three status indicators on the bottom left side of the screen. The indicator displays whether the Web Conference is on or off, whether Record is on or off, and shows a total count of participants who have raised their hand to indicate they have a question.

WEB CONTROLS

Select “Web Controls” at the top left area of the screen to view the list of participants in your Web conference. This includes the participant’s name, Status (shows either “In Lobby” or “In Conference”) and a Question indicator box. If a participant selects the “Raise Hand” button on their screen then a check will appear in the box next to that person’s name on your screen, indicating that they would like to ask a question. As you field questions you can clear the check by clicking on it. Participants also have the ability to withdraw their question and you will see the check mark disappear when this happens. You can use the Question feature as an easy way to do quick yes/no polling during a conference. For example, ask a question and then instruct participants to select “Raise Hand” for yes. This will give you a quick count of those with a yes answer. Instruct participants to select “Lower Hand” to clear the Question indicator boxes.

The following commands are available from the Web Controls screen:

Start Web Conference

The Start Web Conference button allows you to start a Web Conference. When selected, you will be asked if you’d like to assign an optional Web Conference security passcode (4-9 digits). You may proceed without a passcode by selecting “Start.” (Figure 4) If you assign a Web Conference passcode, be sure to inform all participants of the security passcode before you begin the conference.
When a Web Conference is started, participants will see the Ready-Access Web Meeting slide that appears by default in the slide window on the right side of the Conference Control Screen. They will not see the participant list or any of the control buttons. Participants can press “Full Screen” during the presentation to see an enlarged slide screen (if the participant’s screen resolution is 1024x768 then they will automatically see the largest view available). Participants will see the Chat window unless you have this feature turned off. If the participant selects the “Full Screen” view, the Chat window may move behind the slide window. Anytime you send a new message, the Chat window will open on top of the slide window so that participants do not miss new messages. The participant also has a “Raise Hand” button allowing them to indicate they have a question. This button toggles to “Lower Hand” so the participant has the option to withdraw their question. (Figure 5)

To end a Web Conference, simply select the “End Web Conference” button or you can exit the Web Meeting. In either case you will be asked to confirm, to prevent accidentally ending your Web Conference. If you do confirm, the Web Conference will end immediately. When a Web Conference is ended, the system will automatically return participants to the Global Crossing Web page.

SHOW SLIDE PRESENTATIONS DURING A READY-ACCESS WEB CONFERENCE

You may show PowerPoint slide sets, GIF (Graphics Interchange Format), JPG (Joint Photographic Experts Group format), and PNG (Portable Network Graphics format) files. You can use the following buttons on the Conference Control screen (Figure 3) to manage your presentations:

- **Slide Deck ( Thumbnails )** - You can store multiple presentation files in Web Meeting. The files will remain there until you delete or overwrite them. The slide deck displays a thumbnail-sized version of your slides. You may right mouse click on any of the thumbnails to open a full resolution preview of the slide. To present a slide to all participants viewing the web portion of the conference, simply double-click on the desired slide. That slide will then be sent to all participants and displayed, at its full resolution, in the conference control window.

  The slide deck can be scrolled horizontally to see all the slides contained in your presentations.

- **New** - Allows you to upload a new PowerPoint slide set that replaces the current slide set. The new presentation will appear in the slide deck as thumbnail images. You can also use the “New” button to simultaneously upload multiple presentations by using the Shift or Ctrl keys to select multiple files on your desktop. **Note:** Anytime you use the “New” button to upload one or many files simultaneously, it will always overwrite any existing slides you have uploaded previously.

- **Insert** - Adds another presentation or image to the
current slides. The new presentation file is inserted directly following the slide that you select (click once to select and it will be highlighted in red). If you want to add the new presentation to the end of the current slide set, select the last thumbnail in the slide set, then select "Insert." You can also use the "Insert" button to simultaneously upload multiple presentations by using the Shift or Ctrl keys to select multiple files on your desktop. (Figure 6)

- **Delete** - Removes the currently selected thumbnail from the slide set. You can use the Shift key to highlight several slides to delete. You may also check the option in the “Delete” popup box that allows you to delete all of the presentation files currently stored in your Web Meeting. If you do this after your meeting is finished, none of your presentation content will be stored on the Global Crossing servers. **Note:** You will be asked to confirm the deletion. Additionally, if you delete the current slide being presented, the participants will still see that slide until you have selected another slide.

- **Preview** - To preview a slide without displaying it to all participants, click once on the slide to highlight it and then select the preview button. Alternatively, you may move your cursor over the thumbnail and right-click on it. When a slide is highlighted and the preview button is selected, the slide will be displayed in a new window, at the maximum slide size. Only the Chairperson will see the preview.

- **Arrow Keys** - To present a slide to all participants viewing the Web Conference, double click on the desired slide. A Web Conference must be started to present a slide to all participants. The slide will be displayed at its full resolution in the slide window on the right side of the Conference Control screen. The slide window always displays the content being presented to participants. The arrow buttons on the bottom of the Conference Control screen allow you to display slides in the presentation. You can use the scroll bar next to the thumbnail slide deck to locate a particular slide, and then double click on it to display it in the slide window.

- **Helpful Tip:** Do not upload extremely large files. The file size limit is currently 27 MB. Large PowerPoint and image files will take longer to upload.

**READY-ACCESS RECORD**

The Chairperson has the capability to record a meeting with full synchronization between the audio and slide presentation. You may also start an audio-only recording with Web Meeting (if you are not showing slides). Anytime you are showing PowerPoint slides or images during a recording, they will automatically be synchronized with the audio.

To start a recording in Web Meeting, check the box next to “Record” on the Audio Control screen. (Figure 7) You will be asked to enter a name for the recording. This name will be used to identify the recording in the Archive Management system. When the recording starts, a message will play into the audio conference that notifies participants the meeting is being recorded. The recorder will show up in the Audio Control participant list. Fees apply and a new, recorded file is created each time you select the Record button to initiate a recording. To avoid multiple recording fees and files for a single meeting, do not start and stop the recording multiple times during the conference.

![Figure 6: Upload Slides Screen](image)

![Figure 7: Record Button in Audio Control Screen](image)
If a Web Conference is active, the current slide (in the slide window) will be synchronized with the audio recording. As you proceed through your series of slides each slide will be synchronized with the Web Meeting audio. Any time you are not showing slides, or if you record a conference with no slide presentation, the Ready-Access screen will appear during playback.

To end the recording, uncheck the “Record” box on the Audio Control screen. You will be asked to confirm that you want to end the recording. Any time a recording ends, a message is played into conference informing all participants that the conference is no longer being recorded. If the Chairperson exits Web Meeting without ending the recording, the recording will continue until the audio conference ends. The Chairperson can also end the recording by pressing [*] on the telephone keypad at any time (see below).

**Recording via the telephone**

You may also initiate a recording by pressing [*] on the telephone keypad. You will then be prompted to press [1] to continue with the recording (or press [2] to cancel and return to conference). A voice prompt will notify the Chairperson and participants that the conference is being recorded. To end the recording, press [*] on the telephone keypad. You will be prompted to press [1] to stop the recording (or press [2] to cancel and return to conference). A voice prompt will notify that the conference is no longer being recorded. If a recording is in progress and the Ready-Access conference call is ended, the recording will automatically stop.

**Notes on Recording:**

- Use a handset whenever possible for best voice quality.
- If use of a handset is not possible, sit and speak as closely as possible to a speakerphone; headsets may cause static or poor audio quality.
- Mute participants that have a great deal of background noise.

**Recording playback**

Recordings are available immediately after the conference ends. Recordings can be accessed via the Internet (see Accessing Ready-Access Archive Management below) and replayed using either RealNetworks® audio or Microsoft® Windows Media® players. Recordings are stored in MP3 files for superior audio quality and easy playback with no waiting or interruptions. If slides are presented during a recording, both the audio and slides are fully synchronized during playback. The audio controls for playback include: Start, Stop, Pause, Slider bar, Status on content (location and duration), and Volume control bar. The viewer may jump to a specific location in the recording by selecting the thumbnail slide in the recording playback screen. Both slides and audio will be played from that location. The viewer may also use the slider bar to go to a specific location in the recorded conference.

**ACCESSING READY-ACCESS ARCHIVE MANAGEMENT**

You can access Ready-Access Archive Management by selecting “Archives” from the Ready-Access Web Meeting Conference Control screen or you can login directly to Archive Management from www.globalcrossing.com/conferencing.

**To login directly to Archive Management:**

2. Select “Archive Management” under “Web Conferencing.”
3. At the Archive Management login screen (Figure 8), enter your Ready-Access phone number, 7-digit access code and Chairperson passcode.

[Image of Archive Management Login Screen]

**ARCHIVE MANAGEMENT TOOLS**

Previously recorded conferences will be stored in the Archives List (figure 9) for future use. This list includes the title of each archive, the date and time it was recorded and a file ID number. In addition there are some report settings that you can turn on or off. These include the following columns:
→ **Registration** - By default, this feature setting is ON for a new recording. When Registration is ON, a viewer is asked to enter their name, company name, phone number and email address when they access the recording for online playback. The system requests this information but does not require it for playback access. You can change this feature setting for a specific recording as often as you like, just click on the checkbox (checkmark = ON; blank = OFF).

→ **Notification** - By default, this feature is OFF for a new recording. To be notified via email each time a recorded file is played back by a viewer, check the “Notification” box for that recording. (You will need to have a current email address on file with Global Crossing.) You can change this feature setting for a specific recording as often as you like, just click on the checkbox (checkmark = ON; blank = OFF).

→ **Requirements**: You must have either RealNetworks audio or Windows Media Player installed to play an archived recording. You can choose the format to play the recording in by selecting “Windows Media” or “Real Audio” from the menu on the right side of the screen.

→ **Download Audio** - Download the MP3 file to your PC and store it yourself. You can then delete the file from the system to eliminate hosting and playback charges. If you download a recorded file that contains slides, only the audio portion of the recording will be downloaded to your PC. The slides are not stored in the MP3 file - they are in another file that gets automatically synchronized during playback.

→ **Rename** - To change a name of the recorded file select “Rename” and enter a new name for the recording.

  • **Note**: This button is only available if you log directly into Archive Management. To change a name of a file if you accessed Archive Management through the Audio Control screen, select the title in the “Name” column and enter the new title.

→ **Security** - By default, there is no security code assigned to a new recording. To assign one, select “Security” and enter any number between 4 and 9 digits long. (This button is only available if you log directly into Archive Management. To add security if you accessed Archive Management through the Audio Control screen, just select the box in the “Security” column and enter the security code.) Viewers will need to enter the current security code to access the recording for playback. You can change the security code for a specific recording as often as you like.

  • **Note**: If you use the email button to distribute the recording link and you have entered a security code for the file, the code will automatically appear in the email along with the recording link. You can edit this email. If you do not want to send the code in the same email as the link, you may delete it.

→ **Report** - To view a real-time report (Figure 10) showing playback activity for a recording, select the “Report” button. The report header includes basic information about the recording such as date created, name, file duration and total playbacks to date. A line item is listed for each time the file was accessed, showing the date and time it was viewed. If viewer registration information was collected (name, company name, phone number and email address) then it is also displayed. This report can be saved to your desktop by selecting the “Save” button in upper right corner.

*Figure 9: Archives List Screen*

→ Once you have selected an archived conference (click on the button in the first column on the left) you are able to Name/Rename, Email, Play, Download Audio, look at a real-time Report, Delete the file or assign additional Security to the archive. **Email** - To send recipients an email message along with a link to the selected archive for playback, select “Email.” Once the message is received the recipient clicks on the link and can play the recording in its entirety.

→ **Play** - Select “Play” to playback the conference using the selected media player (see requirements below). Using play, pause, stop, and volume control buttons you can control the recording playback. If your recording contains slides, you can skip ahead to a specific slide in the playback.
* Note: The report shows real-time activity beginning 7.21.03.

**PARTICIPANT MANAGEMENT**

→ **Dial** - Dials out to new participants during the conference. (Figure 12) As the Chairperson, you will be taken out of conference and can privately talk with the dialed participant. To have them join the conference, select “Connect” or to return to the conference without the participant select “Disconnect.”

→ **Disconnect** - Disconnects the selected participant from the conference.

→ **Play Name** - Plays the selected participant’s name if Name Record has been enabled on your Ready-Access subscription. This is an easy way to identify the participant on each line so you can type in the participant’s name. If Name Record has not been enabled you will hear “an anonymous participant.”

**AUDIO CONTROLS**

Web Meeting includes integrated, online Ready-Access conference control. This provides all the tools you need to maintain security, add participants, mute lines and manage a successful meeting.

To access the Audio Controls screen (Figure 11), select the “Audio Controls” tab located in the upper left corner of the Conference Controls screen. You can visually monitor status of lines in the audio conference, identify participants and type in their names. You can mute a participant by checking the box in the “Mute” (far right) column. The Ready-Access conference command buttons are located below the list of audio lines in conference.

**PARTICIPANT MANAGEMENT**

→ **Record** - Checking the box, starts a recording of your Ready-Access conference call. A screen will appear asking you to enter a name for the recording and confirm the recording. To stop the recording, uncheck the “Record” box again. You will be prompted to confirm that you want to stop the recording.

→ **Continuation** - When checked, it allows the conference to continue after the Chairperson hangs up. The conference will continue until the last participant disconnects.

→ **Mute on Entry** - When this box is checked, it automatically mutes new participants as they enter the conference (there will still be a “tone” entry announcement). The Audio Control screen must be open, or minimized, for this feature to work. Closing the Audio Control window will deactivate it. Participants can unmute their own line by pressing [*][#] at any time.

→ **Lock** - Checking this box locks the conference. No additional participants will be able to join the conference. When the box is not checked, the conference is unlocked. You will need to unlock the conference if you want additional participants (or an operator) to join.
→ **Mute/UnMute Participant** - Mutes/UnMutes the selected participant.

→ **Mute All/UnMute All** - Mutes/UnMutes all participants that are currently in the call with the exception of the Chairperson. Participants can unmute their own line by pressing [M] at any time.

→ **Operator** - Contact a Global Crossing Ready-Access operator. (Figure 13) When this command is selected, the Chairperson will be offered the option of having the operator join the conferencing in a private sub conference (private request) or join the conference as a participant (conference request).

→ **Help** - Provides a file of general help information.

→ **Phonebook** - Keeps a record of contact information. See Phonebook section below for more information.

→ **Options** - Allows the Chairperson to change Account Options for the current conference call or future conference calls. See Options section below for more information.

→ **Archives** - Allows direct access to stored recordings.

### PHONEBOOK

The Chairperson has the ability to create a personalized phonebook. Select Phonebook from the Audio Controls screen. You can add a new contact, edit and delete existing contacts, and dial a single participant or simultaneously dial out to a 20 participant list. (Figure 14)

### PHONEBOOK Screen

<table>
<thead>
<tr>
<th>New</th>
<th>Edit</th>
<th>Delete</th>

</tr>
</tbody>
</table>

→ **New** - Adds a new entry to the phonebook. (Figure 15) Enter the First Name, Last Name, Company, Office Phone, Home Phone, Mobile, Other and Email. Click “Save” to add the new entry. Note: the phonebook will accept international numbers but they must have the 011 prefix (do not include for U.S. and Caribbean numbers) and should not include other international dialing code prefixes.

→ **Edit** - Highlight the contact whose information you want to edit and select the “Edit” command.

→ **Delete** - Highlight the contact whose information you want to delete and select the “Delete” command.

→ **Add** - Highlight the contact you want to add to the Dial Participant list. You can highlight up to 20 participants and then select “Add” to simultaneously add them all to the list.

→ **Remove** - Highlight the contact you want to delete from the Dial Participant list and select the “Delete” command.

→ **Dial** - Dials out to the selected participant.

→ **Dial All** - Dials out simultaneously to all of the participants included in the Dial Participant list.
WEB MEETING

ACCOUNT OPTIONS

The Chairperson can change their Account Options by selecting “Options” from the Audio Control screen. You have the option of changing features for the current call or for future calls. (Figure 16) The Chairperson can change these settings as often as they like.

Figure 16: Account Options Screens

⇒ Entry Announcement - Select Tones, Silent, or Name Announce. If tones are selected, a tone will sound each time a participant joins or leaves the conference. Name Announce will play each participant’s recorded name followed by “joined” or “left.”

⇒ Enable Name Record - Turn on/off Name Record. When checked, Name Record is on. Participants will hear a voice prompt that asks them to state their name followed by the # key, before they are placed into conference. The system records the participant’s response.

⇒ Save Settings - When this box is checked, the settings will be saved and will apply to future conferences. If the box is not checked, the ‘Entry Announcement’ and ‘Name Record’ settings will apply only to the conference currently in progress.

⇒ Quick Start - Turn on/off Quick Start. When checked, Quick Start is turned on. (This feature is not enabled for all Chairpersons).

⇒ Auto-Continuation - Turn on/off Auto-Continuation. When checked, Auto-Continuation is turned on. (This feature is not enabled for all Chairpersons). When Quick Start is on, Auto-Continuation is automatically on also.

HELP

A “Help” button is available on select screens. The Help button provides a file of general help information.

INSTALLING THE JAVA PLUG-IN

If you do not already have the Java plug-in installed, the Ready-Access Web Meeting service will automatically install it for you the first time that use Web Meeting. If you encounter problems with this one-time installation please contact the Ready-Access Help Desk for assistance.

SYSTEM REQUIREMENTS

⇒ Chairperson PC requires:
  - Windows 98, 2000, NT, XP, Mac OS X 10.2, Linux
